EXPERIENCE

Target, Albany, GA — *Food & Beverage Expert*

AUGUST 2013 - PRESENT

Ensuring the Food and Beverage area is full and up-to-date via accurate merchandising, culling, and handling orders based on trends and historical data. Setting promotional displays, signage, revisions, end caps and new planograms. Cultivating additional sales opportunities with 3rd party vendors.

- Impacted holiday sales with creative product displays resulting in 97% Turkey sell through, which never happened previously.
- Managed team of 20+ during Tornado recovery restock after total loss of refrigerated/frozen product which resulted in an expedient store reopen after a natural disaster.

T&T Movers, Brooklyn, NY — *Mover/Driver*

AUGUST 2004 - JULY 2013

Coordinated relocation services for clients. Analyzed potential job requests and calculated estimates. Disassembly and Assembly of furniture. Wall mount TVs.

- Created solutions in complex furniture delivery situations to ensure success in older and narrow New York building infrastructure.
- Expanded business opportunities after researching and learning TV mounting then teaching staff the process.

Fighters Network, New York, NY — *Web Developer/Editor*

MARCH 1998 - AUGUST 2004

Frontend Development and Design. Content Creation including News, Reviews, In-Depth Guides and Video Content. Forum Administration and Moderation.

- Designed web templates for initial site launch and site refresh.
- Created templates for video production intro/credits/outro to expedite production time.

JANUARY 2022 - JULY 2022

Full Stack Web Development Coding Boot Camp

PROJECTS

It Takes A City Too — Full Stack MERN Application

<https://github.com/cwarmbrunn/it-takes-a-city-too/>

A way to help people in need find resources like food and shelter. A Team Project utilizing Javascript, React, GraphQL, MongoDB, Express, Bootstrap and JSONWebToken. I floated between Front End and Back End working with JS, Bootstrap, GraphQL and MongoDB interactions and Heroku deployment.

Tech Blog— Full Stack Application

<https://www.github.com/faceless128/tech-blog/>

A blogging system that features user management, post management, comments and voting with a clean and sleek interface designed to appeal to technology enthusiasts. Built using Javascript, Node, MySQL, Sequelize and Express.

Shooting Star— External API Application

<https://faceless128.github.io/shooting-star/>

Compare the stats of NBA teams in two cities against each other! A Team Project utilizing HTML, CSS, Javascript, PureCSS, Materialize and Location and NBA APIs. I floated between Front End and Back End working with the location API and layout of the team comparison statistics.

Team Profile Generator — Command Line Application

<https://www.github.com/faceless128/team-profile-gen/>

A command-line Application that will prompt the user for information on a team of employees and generate a HTML page from the input. Built using Javascript, HTML and CSS templates, Node and Inquirer..
